

# Executive Summary

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
## [1] 39 17

## [1] "County"
## [2] "Dropout_Rate"
## [3] "Median_household_income_2012"
## [4] "unemployment_rate"
## [5] "single_female_with_children"
## [6] "Rank_by_Percent_by_Column_B"
## [7] "single_male_with_children"
## [8] "American_indian_and_Native_Alaskan"
## [9] "Black_percentage"
## [10] "White_percentage"
## [11] "TotalRevenuePerStudent"
## [12] "TotalFederalRevenuePerStudent"
## [13] "TotalLocalRevenuePerStudent"
## [14] "TotalStateRevenuePerStudent"
## [15] "Student_number"
## [16] "Number_of_public_schools"
## [17] "Region"
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
